

# ADEPT 10.2.1 Update Summary

---

## 1 Minor Fixes / Enhancements

This maintenance update includes ~140 minor enhancements and fixes:

- Enhance ADEPT-VI to support Simulink bus signals in the data browser
- Playback schedule items in ADEPT-VI now support CSV and MAT files in addition to HDF5
- Addition of Server-side Data Logging capabilities for higher speed data acquisition
- Added progress indicator on Status Bar for long operations like large FTP file transfers
- Improved support for ADEPT Panels on multiple displays
- Enhanced TCP API for interacting with Event Logger
- Performance improvement to NI-DAQ devices on Server

## 2 Major Enhancements

- No significant major enhancements
- Support for several new ADEPT Server I/O hardware interfaces:
  - Acromag ARINC-825 card
  - NI PXIE-6365
  - NI PXIE-4339
  - NAII 75G5-2-SD2AC2Z000FC00 Resolver measurement card
